

REMARKS

Applicants hereby request entry of the substitute sequence listing submitted concurrently herewith into the specification, starting on a new page, immediately following the claims and the consideration of the following remarks. The substitute sequence listing, dated April 26, 2006, serves to replace all previous sequence listings, including the sequence listing filed on August 31, 2004.

In response to the Examiner's requirement, an additional sequence listing, **SEQ ID NO: 115**, listing the following amino acid sequence:

GAGCTGAGCTGAGCTGAGCTGAGCTGAGCTGAGCTGGGGT

is now included in the Sequence Listing. Applicants note that SEQ ID NO: 115 contains 7 repeats of SEQ ID NO: 109 and one copy of SEQ ID NO: 110. Support for SEQ ID NO: 115 is found in the specification, for example, at page 15, line 24. The Sequence Listing, with respect to SEQ ID NO: 115, now also notes that nucleic acids 6-10, 11-15, 16-20, 21-25, 26-30, and 31-35 can be either present or absent, as disclosed in the specification at page 15, line 24. No new matter is added by way of the amendments to the Sequence Listing.

SEQUENCE RULE COMPLIANCE

Along with the present Amendment, Applicants file a sequence listing in both paper and computer readable form (CRF) along with a statement that the paper and CRF forms of the sequence listing are the same and do not add new matter to the specification. The entry of the sequence listing, which is in full compliance with the requirements of 37 CFR §1.821 through 1.825, is respectfully requested.

Please charge any additional fees, including any fees for additional extensions of time, or credit overpayment to Deposit Account No. **08-1641**, referencing attorney's docket no. **39754-0531A**

Respectfully submitted,

Dated: April 28, 2006
